

Instructions for upgrading from GshpCalc 5.0.1 through 5.0.3 to 5.04

Following these instructions will NOT require obtaining a new registration code if you have a current working version of 5.0.1 to 5.0.3.

Following this procedure should not removed your data files (*.GLF, *.GWF, *.SWF and *.ZON), but you should save these files in a backup location before proceeding with the upgrade.

For **Windows XP** users:

1. Click Start / Control Panel
2. Double-click Add or Remove Programs
3. Select current version of GSHPCalc (5.0.1, 5.0.2, or 5.0.3)
4. Click Change / Remove
5. Click Yes ("Are you sure you want to completely remove GSHPCalc ...")
6. Click Yes ("Application Removal")
7. Download GSHPCalc 5.0.4 and follow the installation instructions.

For **Windows Vista / Windows 7** users:

1. Start / Control Panel
2. Click Uninstall a Program (under Programs)
3. Click GSCHPCalc
4. Click Uninstall / Change
5. Click Yes ("Are you sure you want to completely remove GSHPCalc ...")
6. Click Remove All (under Shared Programs)
7. Click OK (under Application Removal)
